

```
package MyPrograms;
//addition of 2 numbers using 2 variables
import java.util.Scanner;
public class Addition {

    public static void main(String[] args) {
        Scanner sc=new Scanner(System.in);
        System.out.println("First No...");
        int a=sc.nextInt();
        System.out.println("Second No...");
        int b=sc.nextInt();
        a+=b;
        System.out.println("Result : "+a);
    }

}
```
